

INTRODUCTION

Milagros Cigueñas, *Investor Relations Officer, Credicorp*

Good morning, everybody. Welcome to our 2025 Credicorp Investor Day and 30-year anniversary of listing in the New York Stock Exchange. Thank you, all of you for coming here, and thank you all that connected through the webcast. Over the next few hours, you will hear about how at Credicorp, we are building a future-oriented ecosystem that is driving innovation, expanding financial inclusion and accelerating growth across cycles. Our management here will share with you how we are leveraging the best talent, the best technology and disciplined execution to deliver sustainable value and unlock very interesting growth opportunities ahead of us. You will also have the opportunity to ask questions. Here, you have the detailed agenda with the topics we will cover.

And now, let me go through a couple of logistics. After the management comments, we will have a five-minute break to be followed by the Q&A session. We will first cover the questions that we have here in the room and then the questions that we have received through the webcast. For webcast participants, you can submit your questions using the "Type Your Question" textbox below the broadcast screen at any time during the presentation. You can also click on the Question Mark icon located on the sidebar to the left of your screen to submit a question. We also want to hear from you your feedback regarding the experience in this event. For webcast participants, the brief survey can be accessed via the survey link at the Resources tab on your screen. In-person attendees may fill out the survey online by scanning the QR code on your table tent card or by completing the printed handout.

Now, I will pass for a moment so you can read our safe harbor. I will mention a couple of considerations. Today's management presentations include forward-looking statements reflecting our management's current beliefs and expectations about Credicorp's future plans, strategies, goals and results. These forward-looking statements are based on current information, and actual results will depend upon known and unknown risks and uncertainties that could cause actual performance to differ materially from what we currently expect. Therefore, you should not rely on these forward-looking statements as an assurance of the Company's future performance. Please take a moment to read this slide.

And now, I would like to introduce our Executive Chairman Luis Romero.
